## Pool and Spa Control System

## Relax. Everything's under control with EasyTouch

Designed for pool/spa combinations that share a common filtration and heating system, EasyTouch® gives you simple push-button control of pool, spa and accessory functions. At the touch of a button, EasyTouch rotates

motorized valves from pool mode to spa mode and fires up the heater to bring the spa up to the pre-selected temperature. EasyTouch does all the work, while you relax in the soothing comfort of your spa. When you've finished enjoying your spa, simply press a single button to switch the pump and heater back to pool mode.

In addition to controlling your filter pump, your EasyTouch system comes with the ability to control three additional functions such as your pool lights, spa lights, and jets.

### The EasyTouch base system includes:

- Power Center or Load Center with pump time clock and three additional circuits to control accessories of your choice (e.g. pool lights, spa lights, jets).
- Two valve actuators for automatic switching between pool and spa mode.
- One-year limited warranty. See warranty for details.

### Additional options include:

- Pool cleaner time clock for setting automatic cleaning cycles (for cleaners with a separate booster pump).
- Sensor to run your pump when freezing conditions occur to protect your circulation system.

## Pool and Spa Control System

By Pentair Water Pool and Spa<sup>®</sup>

## We make automation simple

EasyTouch<sup>®</sup> is the world's easiest to use pool and spa control system. Its push-button simplicity and remote control options let you enjoy your backyard playground without the inconvenience of repeated trips to your equipment pad, memorizing operating sequences, opening and closing valves, and resetting time clocks and thermostats. Just touch a button to control the desired function. It's that easy and convenient.

### Choose the remote that's right for you

Combine your base system with one, two or all three of these control devices. Control pool/spa equipment and accessories from inside your home, at the spa, or from your favorite easy chair.

Four function hand-held wireless remote with up to 150' range

Four function spa-side control

Indoor-mounted control panel with water temperature display for added convenience
